50X1

Reference: Contract Task 1

50X1

Gentlemen:

 has been instructed to submit this request for a change in scope of the referenced contract and task. The following is to be accomplished:

50X1

A. Model AP-3, Portable Supply.

1. Redesign unit so as to increase the output current from 5 amperes to 8 amperes on the unregulated 12 volt output.
2. Repackage the supply. The new anticipated maximum dimensions are 8-3/4" X 5" X 3-1/8".
3. Deliver 10 units of increased capacity AP-3 supply.

B. Model PS-10, Laboratory Supply.

1. Redesign unit so as to increase the output current from 5 amperes to 8 amperes on the unregulated 12 volt output.
2. Repackage the supply, if it should prove necessary, to accommodate this increased output. At this time we believe that it will not be necessary to change the exterior dimensions of this unit, however, some rework of the existing chassis and procurement of some additional components will be necessary.
3. Deliver 10 units of increased capacity PS-10 supply

C. Deliver 25 copies of revised instruction manuals for each type of supply.
